The son of a friend of mine recently picked up a K200-B1 amp which is not working. I volunteered to see if I could get it up and running, so a schematic would be of immense value. Any help in this regard would be greatly appreciated. Thanks and regards.

Hello Steve,

Thanks for the response. Fax# is (718)665-6328. This will make things a helluva lot easier! Best regards

Hello Steve,

The fax# I gave you is at the friend's place of business who actually bought the amp. He works down in New York City and was unable to get into work today due to the snow storm that has blanketed the East coast. He'll be there tomorrow and I'll let you know then if he received it. Thanks again and regards.

Hello 77pbass,

I'm new to guitar amps and have no clue as to the "No Spam" question that <http://music-electronics-forum.com/> asks to confirm that the reader is an actual person (e.g. What amp is associated with Fender guitars?). Hopefully, the fax got through ok and I can proceed from there. Thanks anyway for your input. Regards

Hello Steve,

Here is a better fax# - (860)927-4477. I've since learned that the one I gave you originally has a problem with noisy phone lines in that area. Sorry about that. I know this one is reliable. I'll let you know when it is successfully received. Regards.

FYI...the answer to the question is: Fender.
