Selling a first generation kustom Wah pedal that is used on the K250-4 amp. Hard to find the wah pedal for these units. Very good condition. I've been saving it for a long time in case I came across a K250-4 amp. Decided to change directions and no longer need the pedal.

For those unfamiliar with the 250-4 amps, the pedal sweeps through the 6 positions of the selective boost control to re create the wah effect. I can send a photo of the pedal complete with the connecting cable.

100.00

Pleat
