Hello. I recently bought a 1972 Kustom K250 bass amp. The polarity button functions correctly, but the actual Power button for the amplifier is completely missing, and the only way to turn the amp on is through a power strip. I've found a replacement for the push-button power switch - but I am looking for the blue lens/button that you push. If anyone has one lying around - please let me know. Thank you.

Kyle
