I have a Vintage "What I believe is a"1966 Kustom K200 Tuck & Roll Frankenstein Head. The Amp is in great working shape. Everything is on the amp is 100% functional. I would consider the amp to be just short of mint condition. This is an extremely rare amp. This is one of the first productions of the K200. I have owned this amp for over 30 years. I am glad/sad to say this amp spent the majority of its life sitting under the stairs/in the basement of my parents house. The amp was liberated from the basement when the old house was sold.

I am interested in trading this amp for a low wattage tube amp. I would like something in the 4-12 watt range for practice at home. Let me know what you have and maybe we can strike a deal. I will also consider cash deals as well. Please feel free to contact me with any questions.

678-894-five three six three

I would add an image...but I am not sure how? If you would like to see pictures email or PM me and i will send you what you want.
