---

I used to have a small kollection of black amps and cabs for sale.

The 1969 black K200B-1 with matching "Kustom Electronics" 215 is sold to a nice home in Denver.

My 1969 "Kustom by Ross" 215 and 1971 K200B-5 also are sold, these to a fellow here in St. Louis.

That left me with a K250B-1 with the gigantic 118B-1 W-horn cabinet. It sounds dynamite and projects like nobody's business but it's just too big and heavy for me to lug around so it's up for grabs, too. It is in excellent condition, no rips, cracks or anything. The speaker was professionally rebuilt last year, and it also has a Custom Covers vinyl cover for the head.

The big rig is sold now, too, and has a nice home in the Chicago area, so it's all gone. (Except for my Kustom Charger with the JBL K-140; I'm keeping it.)
