This time I'm looking for some vintage 12-inch CTS speakers for guitar. I have come to find that I like those better than Eminence or other brands in various 2x12 cabs that I have. I know this is a long shot, and pickings on eBay and Craigslist seem to be pretty slim, but I thought I would ask.

Are you looking for 8 or 16 ohm speakers?

I believe my 12-inch cabs generally have 8-ohm speakers in them.

There is a pair on ebay right now for sale.....at least they were there last night. \$130 for pair....8 ohms; also a set of reconed KEI speakers.....16 ohm. Just checked they are still there.
