Hi,

I have a Kustom 415B. Wich was a cab sold together with a KUSTOM IV basshead. Can anyone advice what grillecloth I should buy?

I own the cabinet. But the grille did not come with the cabinet.

I does not look like it ever came with grill cloth, or the needed frame to staple it to and load into the front of the cab.

There is (visible on a bigger picture) room for a frame to hold the grille. So I will be making that offcourse.

Then it will only look like a big black box and does not have the interesting view it now has...

But I'd like it to be more original.

The screens for each 15 inch driver have been installed aftermarket and are definitively not original.

Parts express, or AES stocks the generic black stuff that came on kustoms.
