anybody have any experience with these?

i need to replace the speakers for my k200, and i don't have a lot of money.

other suggestions? i'd like to not go over 100 a piece...

The term raw frame is only used for drivers that are used and blown. Automotive wise, its like a rim with out a tire.

I have a black, not that the color matters, 3x15 cab. that I put in the Eminence Delta 15s. IT ROCKS! I used 16 ohm speakers so the cab. is close to a 4 ohm cab. With the 2x15 you may want to use the 8 ohm speakers so your cab. will be 4 ohm - Kustom heads seem to like 4 ohms. Or you could spend big bucks and buy my rig, it is for sale, and WOW your could blow windows out and chairs over!

I agree that Delta 15's are excellent for the price. Check out www.bltsound.com. I think he has the best price you'll find anywhere.
