Hey guys (and Deb)..I'm thinking about that lil blue 1x12 on ebay...seller is asking full full price but aside from the issue.. I would consider getting the amp if I could find a clean 2x12 cab to sit it on...ya'll (that's southern) know that I like to stack my 1x12 black SC on top of a 2x12 ross cab...makes the coolest looking little stack...so I'd enjoy having one in blue...it needs to be a really clean cab and yes I have rigs to trade if you would prefer that instead of cash..but either way...pls let me know....and thanks...and Play Loud...ET
