---

time traveler

There are three versions of the 5033 board.

On two of them they have R24 listed as a 0.51 ohm 5 watt resistor

They also both have R26 listed as a 510 ohm 5% resistor and R25 listed as a 150 ohm 1% resistor.

The third version lists R24 as a 200 ohm 1% resistor R25 as a 510 ohm5% resistor and R23 as the 0.51 ohm 5 watt resistor. The 5 watt resistors are rectangular in shape.

Hope this helps.

John
