I am looking for a repair shop to rebuild my Kustom 150 4-10 SC combo amplifier. Any recommendations?

HI JOHN  
by rebuild do you mean just replacing the speakers or are you talking full restoration like new tuck and roll , grill cloth , speakers ....? if its just the speakers you could do it yourself if your handy with a soldering iron.grill cloth is not that hard either if your handy with an electric staple gun. could you give more details.

Both channels are dead. They put out white noise, no throughput. The speakers and tuck & roll are as good as the day I bought the amp in 1972.
