Thought someone might benefit from this. Seems like a pretty cheap price if you need them:

Those are the preamp boards and the reverb/mixer board for a K200B-5 PA head, not a 200-1 bass amp.

Just for the record, the pc105 boards used in the B1 models are the same as any of the 4 preamp boards used in the B5 pa models, but the brite switch is removed and the reverb level control pot is installed in its place.
