I have a Kustom V Mixer which sits flat on the table and has 6 Mic Inputs / Master Monitor / Master Reverb / Master Volume / Expanders Monitors In and Out / Echo Input with Send and Receive / 1- 1/4 Jack out for Mains and 1 1/4 Jack out for Monitors... I can't seem to find the P.C. Board / Schematic for this unit on this Website...Any help would be appreciated....

This site has no info on that mixer.

SteveM

I took this Kustom V Mixer completely apart and found some de-soldered places on the board...Re-Soldered them and cleaned the mixer up and it works well now...Kinda nostalgic just being a Kustom piece though

Thanks!!
