My first post so please, new friends, bear with me. Just got a 1970 Kustom K200-B2 amp and 2-15" cab. Head has been serviced and works perfectly, however it has two mismatched speakers. One is a 1984 Eminence and the other is a mystery. Anybody that knows what the factory Jensens were and can offer a suggestion what to use to replace these with would be appreciated. The "mystery speakers" are working fine but have to be tired after 33 years of age....ROCK ON....Dave.
