Hi - My uncle gave me some vintage Kustom gear and I'm looking for any/all info on it. An internet search on the model number didn't really help but it led me to this forum... hoping you all can fill-in the blanks - any info you can provide would be helpful.

I received two standing speaker cabinets and a head. Model: "2K+1H P"

Each speaker tower has what appears to be two 15" (maybe) speakers, two what look like port holes, and a large horn at the top.

Also, he mentioned that there used to be some sort of aluminum tube stand that screwed into the side of the head... does anyone know where I might be able to find those?

Thanks!

JSwat

It sounds like you have the model 303 PA system that first came out in 1971.

You can view it in this sties literature section.

Unfortunately finding a stand for that K300 PA will be a challenge, but hood luck to ya anyway!
