Hi folks,
1st post. I just picked up a K200B5, charcoal, in decent shape, sort of matches my 2x12 charcoal bottom (in great shape). It has a hiss to it, and the 3rd channel is barely audible, but my question is, does anyone have a Radio Shack bulb number for the pilot light? (I searched but found nothing for the K200B5)
Thanks,
ugmold
