The K-200B-5 was built Jul-Dec 1968 and the other there is no way to tell other than looking at speaker codes.

The 302 PA cabs would be late 1971 or newer than the K200B-5 head. The 302 cabs are 6.5 ohms each so both columns to the head would present a 3.25 ohm load.

The speakers were manufactured during the 2nd week of 1974, by CTS. So if the speakers are original, the cabinets were made no earlier than that.
