Hey,

i've got an old A200 Kustom Amp here. One of the output transistors is broken and I need a replacement for it.

The transistor is located at an PC702 power amplifier board, part number Q704 with the numbers 40409 + 38736 on it.

I guess theres no such transistor available out there, so I need an other one that fits in there.

I'm happy about every kind of help

best wishes from germany

HaenC

That would be a NTE-128 transistor
