Anyone have an empty black T&R cabinet that would match my K200B head width?  
I'm looking for the smallest that was made. 2x12 or 1x15 whatever. Don't have need for giant 3x15 cab!

Thanks

2 x 15 is the smallest, but you can remake the baffle board in the front and put whatever you want in it for speakers, 3 x 12's or 2 x 12's etc.

Count the tuck and roll across the top and it will be 12 for what you are looking for and a K100 is only 10.
