I gutted an old Line 6 4-switch controller & wired it for passive. Works great.

I got a Marshall footswitch with my studio and it is working like a charm, don't know if it has been modified though!

The original studio-series footswitch for 2-4-6 valve amps, are so rare, and hard to get. But as Pleat says, it is easy to mod another switch (Peavy/Marshall) I am lucky to have the real one.
