Hi Kustom group!

I need 2 10" speakers for an old silver sparkle 410 combo that I recently bought. The 2 speakers that are working are, I believe, CTS brand with silver cones.

I have a 3rd matching speaker, but it needs reconing. Do any of you know where to get a CTS speaker reconed, hopefully with the silver cone?

If any of you have 2 speakers that will work for me, please let me know. I'd like to get this amp finished.

I'm in Denver.

I presently own a Kustom 100 head, black, not working, but good for parts. I also have a K100 212 combo in black which I am keeping. The 3rd amp is this silver 410 combo. I used to play in a band in the 60's and 70's using a K100 black head and 215 cabinet. It was my workhorse amp for many years.

What CTS models do you need? The square ceramic style or the alnico "Metal strap over a circular magnet". I took some pics of a couple of examples, heres the link

I have a few laying around here. If you have the frames you should be able to get them reconed with the same metal vented dust caps as originals had. Here in Dallas Texas I have mine done at Freeman Tuell Speaker Service for around \$48.00 They look exactly like the originals as you can see in the photos.

Hi Steve,

They are like the silver one in your photos. I'll upload actual photos of them. If I get the broken one reconed, then I just need one more to get all 4 speakers working again. Thanks for the help.
