Steve, this is info I found on the reverb tank.

Type 4FB2A1A, Accutronics, Geneva III.

4 = Long 2 springs

F = 1475 ohms input impedance

B = 2250 ohms output impedance

2 = 1.75-3 sec decay rate(medium)

A = grounded input, grounded output

1 = no lock

A = open side up.

Is this the right tank for my K150-8?

Concerned about the first "A" part, grounded input grounded output.

Other numbers on the tank are:031-0005-00, 25-75-301 & 23572-0.
