Ran across this one eBay:

<https://www.ebay.com/itm/284806092993>

The listing doesn't say, but don't those look like Altec 15s? If you're near that location, that seems like a pretty good price, even if it is a bit road-worn. If they're really Altecs and in good shape, the speakers alone are worth twice the price of the whole rig, I would think.

It's a bit of a drive for me, and I don't have room for it, otherwise, I'd be very interested.
