Monument Music carries handles that are usable. They are current production handle for Kustoms Coupe line of amps. I just got 4 for mine. They are wider than originals but are modified in the "vintage" format to fit originals. Aaron at the sales contact got me the 4 I received ...They don't get as many as they would like but if you check with them they can get some for you. Good Luck Some collector is getting some handle inserts made to fit the old beater handles we all seem to have... no word on them yet but something IS in the works to get some of our old handles rehabed.....Keep checking... we could hear something at any time. I could use 10 + inserts myself. Craig

I recently gave up on finding replacement handles. Since I use my cabinet on a regular basis - I installed some spring-loaded rack handles. Much more sturdy, and I do not think that they look bad. I know that the purist's may cringe - but this cabinet is moved regularly, and I decided to go this route.

Original handles are hard to find though they show up from time to time... keep checking ...they do show up.

I can help you out - I have a couple of "beater" handles. Both plastic inserts are present, one is

---

solid - the other is loose. So, if you are only needing one, I can fix you up with a deal you cannot refuse - if you pay the postage - you can have the handle free ! They also have light surface rust, but would probably clean up fairly well. I have the screws and finishing washers also. Contact me at braud357\_2@yahoo.com if this will help.
