I'm in need of one cord wrap for a Big K head. Any sources that you guys know of?

Does it need to be original?

Hey Steve - I'd prefer it match the remaining one, but I'm open to other options. With the one broken, difficult to store those extra long cords.

Other than off a original amp, I do not know!

On the last custom tube amp head I made I used a old style aluminum flat C shaped draw handle that I cut in half and rounded over then polished the cut end for a cable rap , and its deep jaw works great!
