Guys; gals.....I have found a Kustom studio 4 valve amp in excellent condition and of all things; also a black T&R K100 C-8 with 2x10 configuration. Both amps are in excellent condition both electrically and appearance wise----just for those that maybe need a slight refresher..the studio is the oak cabinet Kustom that has 2 channels with reverb and phaser--2x12" celestions----looks like a vintage Mesa Boogie.....they are each offered for sale @ \$250.....

What do you suggest? I wish I had the funds to get both---but alas, cannot.....Love to hear your recommendations.....

I would also love to hear from anyone that either has owned one of the Kustom oak cabinet studio amps and what they think of it.....

THANKS!!
