Kochens,

I WOULD LOVE to get these schematics from you.

I have two of the three models of Studio Valves...

I have private messaged you my E-Mail address, if you would be so kind.

Would love to have the info needed to preserve my prized amps.

CHEERS!

Thank you, thank you, thank you!

---

These are exactly what I need to get my beloved Studio 4 Valve back to its original luster!

I would GREATLY appreciate a copy of the schematics for the Studio 4 Valve.

Problem is I bought it new 30+ years ago and I'm pretty sure it's the 150 (12" celestian speaker X2) but my memory isn't as good as it used to be and there is a slim chance it may be the 100???

There is nothing on the cab to identify either.

Thank you so much...

chiefdlane@juno.com

2valve studio = 50W  
4valve " =100W  
6valve " =150W

Any chance of getting the schematics for the Kustom Studio 4 valve now?

Thanks,

Dan

Hi Kochens,

I have an older Kustom 100, model 100 2, serial #47371. Do you have any idea where I might find a schematic for this amp? Thank you in advance for any info and for providing the web site. Happy New Year!

Sincerely,

Mark

Most times our good buddy on this site Pleat will send/email you a schematic, if not PM me and I will fax you out one if you have a fax number, or I will make a copy and mail you one.
