Recently picked up a TRT100 in Blue Sparkle with a matching 2-12 Jensen Loaded cab, I've loved it dearly, and I'm looking for a second one to complete my stereo guitar rig, as my delay/reverb/chorus setup is awaiting the moment to be unleashed... Can someone help me find this dream amp? I know these are the reissue tube amps from the early 2000's, mine has a 2-12, but I will take 4-12 as well, or a 2-12 stack of another color. I'm willing to pick up in Northern California or cover shipping costs to transport it here.
