This amp is one of the nicest most well preserved specimens i've seen out there. I aquired it from an old man who passed away in his 90's and bought this amp brand new 38 years ago and it never left his basement, and was kept under the Kustom cover almost it's whole life. The power cord looked almost unused and even the rolling casters were spotless! I was shocked when I saw it. I have some great pictures of it if anyone is interested. Just let me know. I know that black is not the most desireable kustom color, but this one is just so well kept that it doesnt even matter. I'd like to hear what it's worth to someone, please let me know.
