Hi, Is there anyone among you who has a pdf from the layout of the power amp PC Board 009-5065-00, KEI-1. It's the one without master volume dating early 1975. Thanks anyway, mathias61

What is it that you are looking for? The schematic is posted in the technical section of the site and half of the board layout is there as well.

About all some Kustoms ever had was a transistor layout, and this board unfortunately is not one that had such.

Steve, if you look at the schematic for this board that is marked 10-71, there is a second page that shows part of the pc board layout, so there is one for this board.

Lol! Yes, bill
I found one in my own stack of K250 schematics !
I just don't need it any more to fix these 5056 boards that I forgot I even had one !

Please for give the mis info I posted!
