hey I'm trying to find some info about a kustom kasino concert P.A. its not a (umm i guess you can call it a) box its a slant back with 6 channels a EQ slider and it has revirb on it and i have the original speakers with it and they are two 12"(i think) and a horn I'm not sure what type of speakers they are but they can kick, one of them blew out when i first got them out, my dad bought them used back in 1983 and the speaker screen was a baby blue and he did not like it so he tore it off and just used them like that, then i found them in a garage and i pulled them out and one of the drivers fell off (i don't know how) and the speaker had blown out from that so anyway i would like some info about them so i can rebuild them cause the working one works just fine o ya and by the way the amp face plate is baby blue

and i will try to get photos of it
