I have a Model 2-15J-4 that I was able to identify as a 200 with 2 matched Jensen 15" speakers and Reverb, Tremolo/vibrato, harmonic clipper and selective boost (thanks to other post and literature on this site!). I also believe it to be one of the first production as it has "door knobs" instead of cleats for the power cord. The SN is 17385. It also has 4 prong male XLR port. What am I dealing with here?

Thanks for any help you may be able to provide.

GOB
