Just can't believe how many K-heads are still out there. I have gigged for almost 20 years with a '72 K250 silver sparkle 2x15 rig. Still have the black covers with the Kustom logo screened on them. Used primarily for a bass amp even though it has trem & vibe. This friend has NEVER failed me and always gets the comments from the crowd. Just picked up a tolex Kustom III 130watt set with 4x12 cab for my son at a thrift store for \$100 and it cranks. Viva big 'K'.
